## Service Technician – Multiple Locations, California

### Job description:

Compressed air system preventative maintenance and repairs – perform routine, preventative maintenance and repairs on oil injected and oil-free air compressors, compressed air dryers, ancillary equipment, blower and vacuum pumps and systems.

Responsibilities will include, but not limited to:

- Troubleshoot malfunctioning equipment
- Read and comprehend technical manuals including service manuals, parts manuals, installation instructions, troubleshooting documents, etc.
- Determine root cause of failure and perform repairs.
- Document the correct operating parameters and repairs.
- Rebuild compressors and blowers.
- Electrical wiring and troubleshooting.
- Provide basic tools to accomplish the job with normal maintenance of tools and equipment.
- Provide a high level of customer service and serve as an ambassador for the company and maintain confidentiality.
- Train and assist other service technicians.
- Provide technical support to sales and parts department personnel as required.
- Promote and practice proper safety procedures.
- Complete work orders, service data, time cards, expense reports and other job-related paperwork as required.
- Ensure company supplied service vehicle is kept clean and represents company well.

### Experience requirements:

Technician “class” dependent on experience. 2-4 years of technical field experience maintaining and repairing rotating equipment, preferably compressors. Strong mechanical, plumbing and electrical skills.
